The closing date for comments on the Notice of Intent to Delete was August 12, 2019. One public comment was received. The comment indicated that the EPA should report to the public the activities conducted to cleanup the Site and what will continue to be conducted to protect the public health and the environment, including reporting costs incurred and estimates of future costs. The EPA's response is that included in the docket were reports of the activities conducted at the Site including, the NOID, the FCOR, the latest Five-year review, and others. The docket also included the Remedial Action report, which included the requested available costs. The EPA believes the deletion action has been conducted in accordance with CERCLA and the NCP, therefore the deletion of the Site from the NPL is appropriate. A responsiveness summary was prepared and placed in both the

The EPA maintains the NPL as the list of sites that appear to present a significant risk to public health, welfare, or the environment. Deletion from the NPL does not preclude further remedial action. Whenever there is a significant release from a site deleted from the NPL, the deleted site may be restored to the NPL without application of the hazard ranking system. Deletion of a site from the NPL does not affect responsible party liability in the unlikely event that future conditions warrant further actions.
